

Integrated Heat Transfer and Cooling Solutions for Biogas Plants

Our Associates

Our Journey...

ARH Technologies Pvt. Ltd. is a professionally managed engineering company specializing in heat transfer and process cooling solutions for a wide range of process industries. Since our inception in 2012, we have been committed to delivering energy-efficient and sustainable engineering solutions that prioritize performance, reliability, and environmental responsibility.

We understand that cooling is essential part of bio-gas projects, where we come in and provide the cooling solutions for CBG projects

Why Choose ARH as your partner?

We understand the importance of Cooling which is essential & critical part of a Biogas Purification System

We are one stop one shop for Cooling & dehumidification solution Using heat exchangers, water chillers, glycol chillers, Cooling tower tanks, centrifugal pumps and root blowers

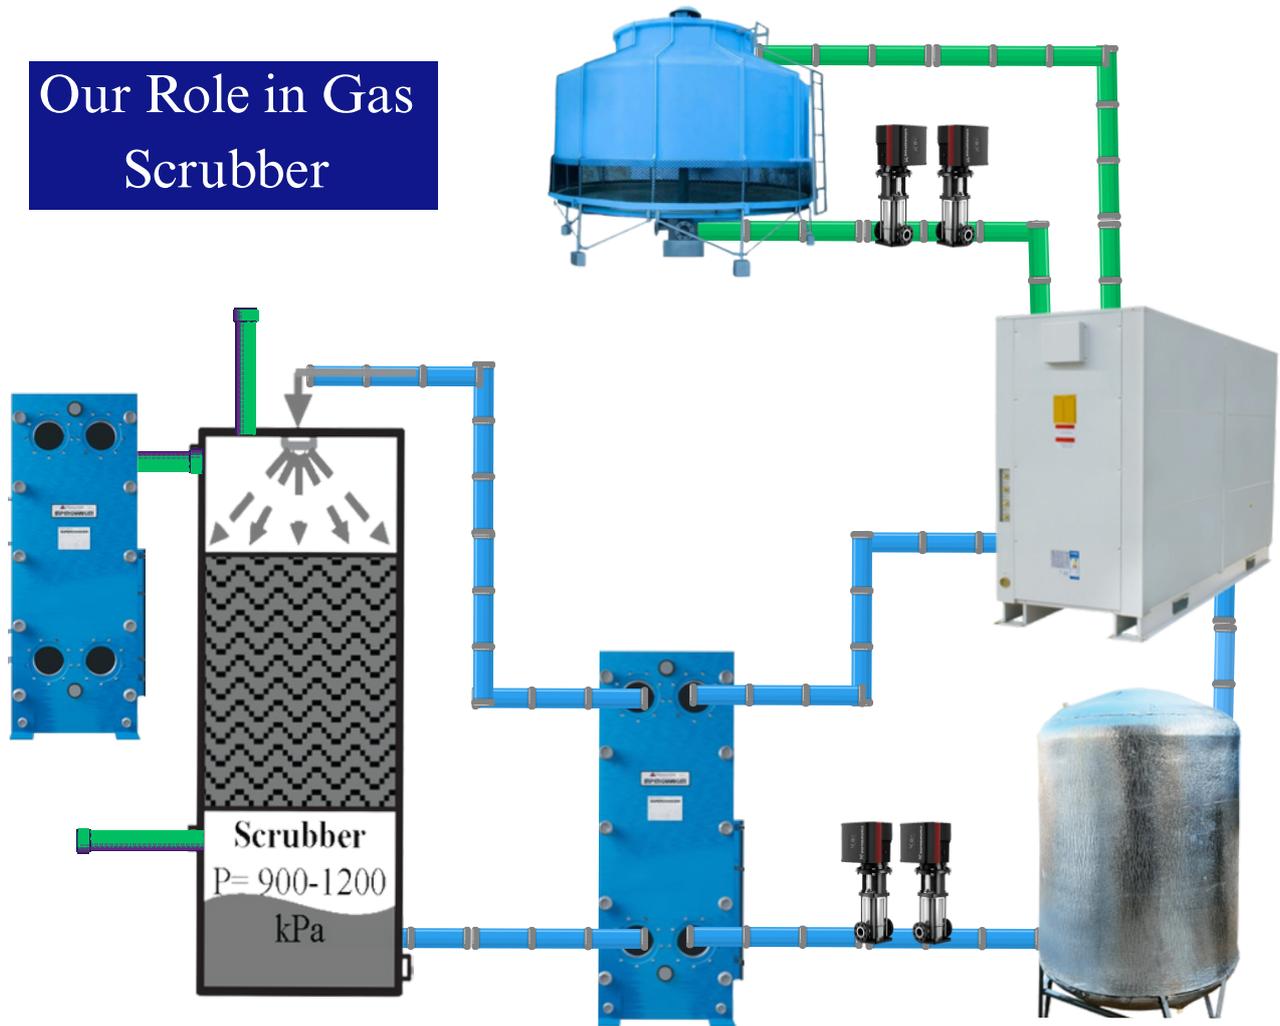

Every product and system design is based on core concept of **Sustainability & Reliability**

Powerful Performance
-Redundancy & Reliability
-Aiming 100% uptime.
-Lowest cost of maintenance
-Ease of operation

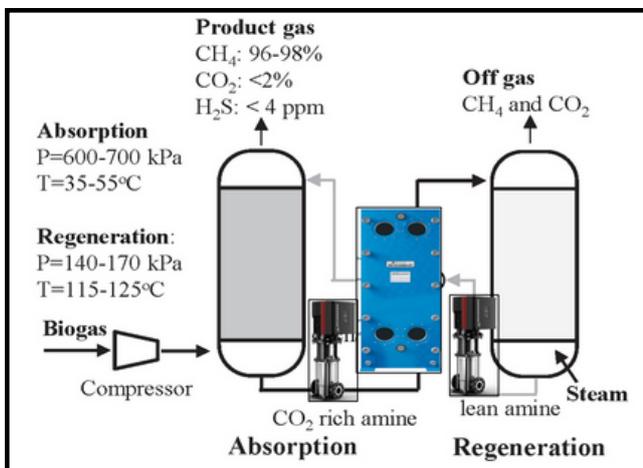

...empowering your sustainable journey

"ARH ensures long-term customer satisfaction through expert on-site service, timely maintenance, and performance optimization. With certified energy auditors, we help clients reduce energy use and minimize their carbon footprint."

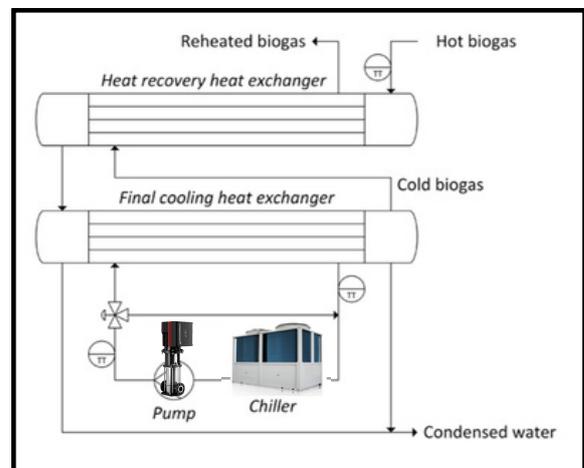

Our Role in Gas Scrubber

Our Role in Absorption Process

Our Role in Dehumidification process

Our Products

Werner Finely Modular Chillers

Tranter Plate Heat Exchanger

Grundfos Pumps

Root Blower

Cooling Tower

S&T Heat Exchanger
